Introducing the Dynamax D-Ball... Dynamax's first official slam ball that can be thrown and slammed against hard and rough surfaces, both indoor and out. Made of a durable 9" PVC shell that won't warp, and non-shifting insides, the Dynamax D-Ball is ACFT (Army Combat Fitness Test) approved and ready for action. Made in the USA, our new slam ball comes in weights ranging from 6lb - 20lbs, and is constructed with the same craftsmanship and integrity you've come to expect from Dynamax.
